CALIFORNIA STATE POLYTECHNIC COLLEGE

Volume XXXIV No. 15

San Luis Obispo, California

Monday, October 4, 1971

Singer-guitarist Danny Cox, performs at comedy team of Cheech and Chong, and folk Friday nights concert. Also featured was the singer Kasja Ohman.

## Mellow was the feeling

by JULIE WIZOREK

For those people who went to the Danny Cox concert Friday night looking for a way out happening full of light shows with plenty of groovy people, they couldn't have been in for a bigger surprise. Instead of the usual college concert affair, what emerged was a gymnasium full of warmth and happiness evolving from the performances of four talented artists to a small audience genuinely willing to listen and enjoy.

First, there was Kasja Ohman, guitar about her, a little like

Buffy Saint Marie, a little nervous but so romantic that there could be no dispute. With flowing dress and long dark hair she shared her experiences with songs of friendship, hopes, dreams and failures with a warm sincerity.

Next were Cheech and Chong, billed as the only Chinese and Mexican comedian team in the world and probably the only ones who could deliver funny material that was blasphemous, obscene and satiric but also at the same time totally approved by its listeners.

Then came Danny Cox with straw hat, pink shirt and mustard colored pants with a voice all the more colorful than the garments he wore. With sweat pouring from his face onto his chest and guitar, eyes radiant and body erect, he talked then sang of life which he and others have experienced. He went from blues to folk with the cool conviction of one who has total faith in the world about him.

With Cox's last song, the concert ended as naturally as it had begun—no electronic circus but just a feeling of an evening well spent.

## Pentagon Papers freed

by TERRANCE W. MCGARRY

Los Angeles (UPI) - A federal judge Friday freed Anthony J. Russo, the only person jailed in the Pentagon Papers leak, and in a precedent-shattering ruling ordered the government to give Russo a copy of his secret grand jury testimony to make public.

The decision was an unexpected victory for Russo and Daniel Ellsberg, former colleagues at the Rand Corp. think tank, who have said they worked together on the public disclosure of the controversial Pentagon report on the origins of the Vietnam War.

"Wonderful, wonderful," enthused Ellsberg. "This is a great victory." Ellsberg has been indicted for violations of the security laws, for leaking the Pentagon Papers to newsmen, by

the same grand jury that jailed Russo for 47 days for refusing to testify about his association with Ellsberg.

Ellsberg, who said goodbye to Russo in an emotional bear-hug farewell at the jail door when Russo was taken into custody, was in the courtroom to see him freed. They walked through the courthouse door with their arms around each other's waists, smiling happily.

"I am proud to have a friend like Tony - a friend who will go to jail for you" said Ellsberg.

Russo agreed Friday to give the grand jury the testimony the government has demanded - but only on the condition that he be given a copy of the official transcript of the proceedings, saying he intended to make it public.

## Coalition plans war moratorium

The Oct. 13 moratorium, and its local impact, were the main issues discussed at the San Luis Obispo Peace Coalition meeting last Thursday. Plans for action involving the community as well as the campus were clarified.

A movie, "Time is Running Out" depicting the horror of Vietnam, and American and Vietnamese reaction to the war, was shown to the 40 people at the meeting. "We wanted to show this film as a reminder," commented chairman, Penny Cooter.

The next meeting is scheduled for Saturday, Oct. 9, at 3 p.m. in the Assembly Room of the United Methodist Church. The church is located at 1515 Fredericks, and all interested persons are invited.

## Visitors are registered

by KATHY BEASLEY

"Sign in please." That was Gary Moore's smiling invitation at the beginning of all the old "What's My Line" shows. Now the same invitation is issued to all visitors in the dorms.

Director of Housing, Robert Bostrom said that the sign-in, sign-out program applies only to people going up to rooms. Lounges are still free territory.

Different sources came up with different reasons for the new policy. A resident manager explained to one irate student that people living in the dorms were often hassled by "Jesus freaks," members of the opposite sex, and other unsolicited visitors. The new policy pins down each visitor as to where he is going and whom he is visiting.

Bostrom pointed to elimination of theft and enforcement of the visiting hours as the main reason for signing in and out.

Dean of Students, Everett Chandler said that the policy "was the result of actions of last year." According to Chandler,

the system was suggested to President Robert Kennedy at a presidents' meeting as "a workable method used to other campuses."

"We're not making a big deal out of it," said Chandler upon further questioning. He said that the system is a protective device against theft and security problems.

A policy of closed doors in the dorms began spring quarter, after a student poll and parent questionnaire confirmed the demand for no restrictions when visitors are in a room. The vote of confidence was overwhelming from the student poll, but the parent questionnaire agreed only to a lesser extent, according to Chandler.

Besides the sign in and out program, the college has also set maximum visiting hours. Bostrom said that each hall votes on which visiting hours they wish to have within the maximum hours. Whether or not guests have to be escorted is also decided by each dorm.

## Dorm visiting hours vary

Visiting hours vary from dorm to dorm although there is a maximum set by the college. Most halls are still using the hours voted upon by hall residents last year although elections are expected to be held soon.

Yosemite, Santa Lucia, Fremont, Sequoia, and Muir Halls are all using the maximum visiting hour schedule—from noon to midnight, Friday and Saturday and from noon to 10:30 week nights.

Trinity Hall has the strictest set of rules. According to a resident Manager there, the hours are: Monday through Thursday, 3-6 p.m., Friday and Saturday, noon to 6 p.m. and 8-11:30 p.m., and Sunday, noon to 9:30. The R.M. added that guests are required to be escorted according to the girl's own vote.

## LETTERS TO THE EDITOR

## Honesty, morals and cells

Editor:

This is an open letter to all on-campus residents.

## Name one thing that hasn't gone up since 1950.

Try. Try hard.

The only thing we can think of is what we make. The Swingline "Tot 50" Stapler. 99¢ in 1950. 99¢ in 1971.

And it still comes with 1000 free staples and a handy carrying pouch. It staples, tacks and mends. It's unconditionally guaranteed. It's one of the world's smallest staplers.

And it's the world's biggest seller. Could be that's why it hasn't gone up in price in 21 years.

If you're interested in something a little bigger, our Cub Desk Stapler and Cub Hand Stapler are only \$1.98. Both Tot and Cub Staplers are available at Stationery, Variety and College Bookstores.

The Swingline "Tot 50" 99¢ in 1950. 99¢ in 1971.

If you can name something else that hasn't gone up in price since 1950, let us know. We'll send you a free Tot Stapler with 1000 staples and a vinyl pouch. Enclose 25¢ to cover postage and handling.

Hey, kiddies, don't you like the way Uncle Bob Kennedy, Uncle Ev Chandler, and Uncle Bob Bostrom are taking care of us here in the residence halls? Boy, it's just like San Quentin where you've got guards and cells, huh? There's someone watching you all the time to keep you honest and moral. Boy, they make you feel right at home here.

How many of your parents made you follow the rules you have to follow here? How many of your parents made all your visitors sign a list before he or she could come in to see you? How many of your parents tossed your girlfriend out at 10:30 p.m.? How many of you have eaten food like you eat here? Not many of you I'll bet - if any at all.

Yeah, the Tricky Trio are taking care of us so good that we can't even live normal lives.

Why? I asked that last year and I got a bunch of garbage that made no sense at all. In fact it didn't even make nonsense. All we want to do is live an unhasled normal life like at home. That must be too much to ask, because the way things are now, we can't. The Tricky Trio would counter that it would be chaos. How would they know—they won't even try letting us live without any restrictions. They might say, "Your grades will fall." We must have been able to study at home or else we wouldn't be here.

You may ask, "What can we do?" The ASI offices are open all day. If enough people scream about the living conditions here to Pete Evans and Marianne Doshi, something might happen. Blotch about it - that's what Pete and Marianne are here for and welcome it.

Steve Witten

## Sex survey evaluated

The pink cards circulated during registration to survey students' needs for information about human sexuality have been tabulated, but results are not going to be announced until the second part of the survey is completed.

ASI President Pete Evans says that the study committee will now extend the questionnaire to campus organizations in order to insure that the greatest number of student get a chance to reply. Committee members will send survey cards to any organization that asks for them.

The reason for the survey, according to Evans, is to find the potential interest in a seminar or class in the study of human sexuality. It was initiated after several members of the counseling staff, Health Center staff

and interested students met to discuss the problems of a large number of students who had come to them for help in personal relationships.

## Oven danger

WASHINGTON UPI—The Food and Drug Administration (FDA) late Friday warned owners of model RR-1, Amana Radar Range microwave ovens not to use them until they are checked by authorized servicemen for possible hazardous radiation leakage.

The FDA said in a statement that four samples of the oven had been discovered to have defective safety interlock latches which could allow the oven to operate with the door open.

## EDITORIAL

## Work ahead to end draft

President Nixon signed a military conscription bill last Tuesday that once again extended the draft two years. Hopefully, his action will signify the final extension of that unfortunate piece of legislation.

When he signed the extension Nixon said he hoped "that this is the last time the President must sign" such a bill. Unfortunately, he refused to grant a \$2.4 billion-a-year military pay raise because of his wage-price freeze.

It's fine and dandy to say it but it's something else when it boils down to action—the "it" being to terminate the draft. As one of the major incentives toward an all-volunteer army, a pay raise is essential. And Nixon's decision did run contrary to an interpretation by Rep. F. Edward Hebert, D-La., chairman of the House Armed Services Committee, and others who contended the draft-pay increase bill superseded Nixon's authority to enact the freeze.

Some argue it makes little difference whether military pay is raised now or later. But, every procrastination is of the utmost importance.

One of the major reasons the Senate first voted for debate-limiting cloture and then passed the draft bill was due to testimony of members of the Pentagon and Nixon administration who claimed the nation was facing a military manpower shortage. Fair enough. But why was there a "manpower crunch?" Why hadn't a new military volunteer-incentive program shored up service levels?

Critics of the all-volunteer concept used that excuse of the manpower shortage during the three-month draft drought—as leverage against ending the draft. Based on enlistment level reportedly far below necessary, their argument ran that a volunteer system could never work.

But there really was no comparison, because when the draft is finally eliminated, wages within the service will necessarily need to be much higher than at present. Consequently, along with other benefits, a hitch in the Army or Navy or Air Force will be much more appealing.

To insure that the system will be workable when the draft bill again comes up for passage, in 1973, action must be taken now. Military pay raises are essential. Different criteria must be established. In general, precautions must be taken so that in 1973 the nation is prepared to accept the new program.

Both senators from California, Alan Cranston and John Tunney, opposed passage of the new draft extension. They failed. Both must now turn towards eliminating the draft in 1973. It is imperative that the details be completed prior to the next vote. The groundwork must be laid now to abolish the draft.

## Top draft ceiling set

This year's draft number ceiling has been set at 140, according to local board memorandum recently issued from the national headquarters of the Selective Service.

A representative from the local Draft Education Center said, "It is advisable for anyone with a number above 140 to give up any

deferment and take his period of eligibility this year."

Anyone having questions concerning the draft is urged to contact the Draft Education Center located at 2080 McCollum Street, San Luis Obispo. The center is non-profit and is open Monday through Thursday from six to nine p.m. The phone number is 544-6332.

## New DJ

# Sightless rock

Paul Hutson, a 21-year-old journalism major from Colorado, is a disc jockey at KCPR, the campus' FM educational-rock station. Besides spinning platters, reading announcements and joking with callers on the telephone, he announces the time occasionally.

Nothing unusual about this except that this DJ is totally blind and has been so from birth.

Being blind hasn't stopped Paul from doing the things which he enjoys most: one of those is broadcasting.

"I guess I've been into radio all my life. It's in my blood," he said. "Last year at my junior college I had my own radio program, but they wouldn't let me do my own engineering. At KCPR they are letting me do everything, after I get some more practice in."

Paul attended Bakersfield Junior College, Cal State at Bakersfield and Los Angeles Valley Junior College. He is now a junior and has a GPA of 3.0.

Being blind presents a problem working as a DJ. Paul, with the help of KCPR, has a system which enables him to work a shift with the minimum of difficulty.

"The records are categorized alphabetically," he said. "I have learned by feel where each section is located. I reach say, say into the 'B' section, pull out a record and listen to the first few seconds of the cut until I know which group it is. As for announcements, many are recorded on cartridges and placed in a car rack. The numbers run from one to 44 and I have learned where they are by touch."

While he still is learning at KCPR, someone is in the studio with him, helping to find records and to read the live announcements. Soon, however, there will be no need for a second person: the records will have their names affixed in braille and all live announcements will be written in braille.

If you wonder how a blind DJ tells the audience the time, Paul's watch is braille, and he is yet to be off in telling time by more than a few seconds.

However, Paul has encountered difficulties, the biggest is people not understanding or knowing how to react to him.

"My biggest problem is people because they try to do everything for me," he quipped. People are kind to me. But I can do most everything anyone else can, only in some cases slower."

If you wonder how Paul can listen to the first few bars of a song and tell what group it is, his hobby is listening to and taping music in his Sequoia Hall residence.

Paul would like to stay in the San Luis Obispo area and work as a DJ at a local station, or possibly move into television after graduation.

"I realize that it won't be an overnight thing," he said. "It's going to be a long and hard struggle."

Paul's immediate supervisor is Steve Raegnitz, who said of Paul's ability as an announcer:

"Paul is one of the fastest most ambitious DJ's the station has. His determination to become a good DJ has enabled him to learn most of the techniques faster than most of our other trainees." His style is a smooth one and with a little practice he could become very professional on the air. His technique is good and with time his vocals will improve."

So next time you see Paul walking, his white cane sweeping the area before him, give him a record request. After all, he said of his show:

"I want to play good music, music that my audience will find desirable. That's all I want to do."

Campus radio KCPR made another first this academic year with the acquisition of Paul Hutman, who is blind, as a disc jockey. Hutman, manages to identify the records he wishes to play with the aid of an alphabetical selection of records and his ability to recognize songs after hearing just a few bars of the music. ## THE CAMPUS CHRISTIAN CENTER

Your Campus Pastor . . . Rev. Bruce E. Tjaden

Serving ALL Students & Faculty . . . on behalf of the Presbyterian, Congregational, Episcopalian and Christian Churches.

1400 Foothill Blvd., The white house across Campus Way from the Student Health Center . . . 544-3710

We have a great future behind us.

It took us 23 years to get this far. Obviously, we didn't make it on our good looks.

The Beetle we make today bears a striking resemblance to the 22 Beetles that preceded it.

That's because we invested all of our time in making a Volkswagen run better and last longer, instead of wasting our time making it look different.

To date, we've changed and improved our basic model thousands of times.

And some things we left alone. You can still squeeze a lot of mileage out of one gallon of gas.

Our air-cooled engine is still impervious to temperatures of 10 below and 110 above.

And when you part company with a Volkswagen, you still get something tangible to remember it by. Something green.

In fact, according to the NADA Official Used Car Guide, the same Volkswagen Beetle that sold for about \$500 less than the average economy car three years ago, now sells for about \$200 more.

So today, as we look at all the new economy cars trying to learn in one year what it took Volkswagen 23 years to learn, we can muse on something somebody said almost 20 years ago.

"The best index of the future is the past."

Because if that's true, we have a beautiful past to look forward to.

# Lumberjacks fall to Mustang attack

by STEVE GALE

Coach Joe Harper and his Mustangs utilized a strong rushing offense last Saturday night to gain their first victory of the season by beating the Humboldt State Lumberjacks 39-21.

Junior fullback Mike Thomas arose from the injured list to lead the pack with his two touchdowns and 118-yard rushing performance before 6,000 fans at the Redwood Bowl in Arcata, the hometown of Humboldt.

Both teams had difficulties in finding the handle on the ball as a total of 11 fumbles were recorded, the Mustangs losing five of their seven.

The Harpemen let loose in the first period and piled up 17 points while the Lumberjacks failed to advance into Mustang territory. Poly cooled off in the second quarter but retained its 17-0 lead at the half.

Once again, the Mustangs relied heavily upon their ground game while the Lumberjacks went to the air. 308 of Poly's total 447-yard offense were from rushing attempts, while 253 of the Lumberjacks' 304 total offensive yards were from passing.

Harper termed his team's ability to establish a running attack on offense as "excellent, and," he added, "our rushing defense was as good as it's been all season." The Mustang defense held Humboldt to a net gain of zero yards in the first half, while allowing only 53 yards in passing.

However, the Mustang pass defense encountered problems in the second half as Lumberjack quarterback Gary Peterson threw for 300 yards and three touchdowns.

Poly quarterback Steve Bresnahan entered the Humboldt game as the nation's leading offensive gainer in the small-college division, averaging 285 yards per game. However, his average dropped after Saturday night as he gained only 145 yards.

The Mustangs opened the scoring on a nine-yard run by Mike Foley with 5:51 remaining in the first quarter. After kicking the extra point, Mike Guerra came on with 1:50 left to boot a field goal from 29 yards out,

making the score 10-0. Thomas closed out the first half on a ten-yard run into the end zone with 10 seconds remaining in the first quarter.

Humboldt gained its initial score with 10 minutes left in the third quarter on a pass from Peterson to Mike Bettiga for 58 yards. Bresnahan made it 24-7 with 11:16 gone in the same period on a five-yard run. Mid-way through the fourth period, Bresnahan threw 27 yards to Amos while John Pettas (extra-point holder) reached the end zone on a broken

play for a two-point conversion.

Peterson passed 17 yards to Rich Baker for the second Lumberjack score with 4:51 to play. 38 seconds later, Thomas broke loose for 33 yards on a run to the end zone for Poly. Humboldt finalized the score on a Peterson-pass to Bettiga for 36 yards and the TD.

The Mustang record now stands at one win and two losses as they take an extra week to prepare for the Fresno State Bulldogs who will visit this campus October 18th.

## Return of the ugly man is slated

Ugly is in! After centuries of degradation and oppression, eligible uglies can now flaunt their formidable features with a new sense of pride. Recognition and fame will be bestowed upon the winner of the forthcoming Ugly Man Contest, to be sponsored by Alpha Phi Omega.

A donation of one penny will carry one vote for the Ugly Man, and the sponsoring club is permitted only one vote for their candidate.

The winning ugly is awarded a plaque, and during Homecoming festivities, appears at the Friday night bonfire, at the dance afterwards, on the APO float in the parade Saturday, half-time at the football game, and leads off the Coronation Ball, besides receiving prizes from the downtown merchants.

## Drop-in center

Beginning Oct. 4, the Counseling Center will offer its services in the evenings, according to Dr. Robert Barrows of the Counseling Center.

Monday through Thursday of each week a Campus Drop-in Center will be open at the CU 214 6-12 p.m.

Counselors will be available in residence halls one or two days per week at the following times: South Mountain Hall 8-12 p.m., Yosemite Hall 8-12 p.m.

Additional information is available by calling 546-2933, the CU information desk, or 546-2511.
